Federated QA on LOD

future

Challenges

- Discrepancy
 - ✓ Model representation (in NL)
 - ✓ Data representation (in EP)
 - ✓ Lexical discrepancy
 - ✓ Structural discrepancy

which proteins phosphorylate IκB?

Typical approach

- Parsing
- Lexical Matching
- Structural Matching

Typical approach

Who wrote the Neverending Story?

Lexical/structural matching

LODQA

- Open source project
- Highly portable to any SPARQL endpoint
 - ✓ Assumption: SPARQL endpoints in public are beyond anybody's control.

LODQA

- Current state
 - ✓ Project under progress
 - Focus on addressing **structural discrepancy** (○)
 - Lexical discrepancy (△)
 - Templating (×)
 - Relation matching is not yet implemented.

LODQA

- Current state
 - ✓ Project under progress
 - ➔ Incomplete system, but
 - ➔ useful already to some extent.
 - ✓ *“not being perfect does not mean it's useless.”*
 - ✓ *“will keep it useful during development.”*

LODQA

- Three step approach

1. Graphicator (parsing)

- Turns a natural language query into a ***pseudo graph pattern (PGP)***

2. Lexical mapping (dictionary lookup)

- To anchor the PGP on the target graph

- ***anchored PGP***

3. GraphFinder

- Search the KB graph for the anchored PGP.

LODQA

Querying linked open data (LOD) using natural language. Sounds great? Let's realize it!

Front
Motivation

github

LODQA (Linked Open Data Question Answering) is an open source project aiming at developing a system to generate SPARQL queries from natural language queries.

News

- (02/17-21/2014) OKBQA 2014 Hackathon is held in Jeju.
- (01/10/2014) Relation detection is improved to find the right pairs of terms in relation.
- (12/20/2013) LODQA is launched as an open source project.

Prototype Demo (targeting OMIM)

what side effects are associated with streptomycin?

submit

Example

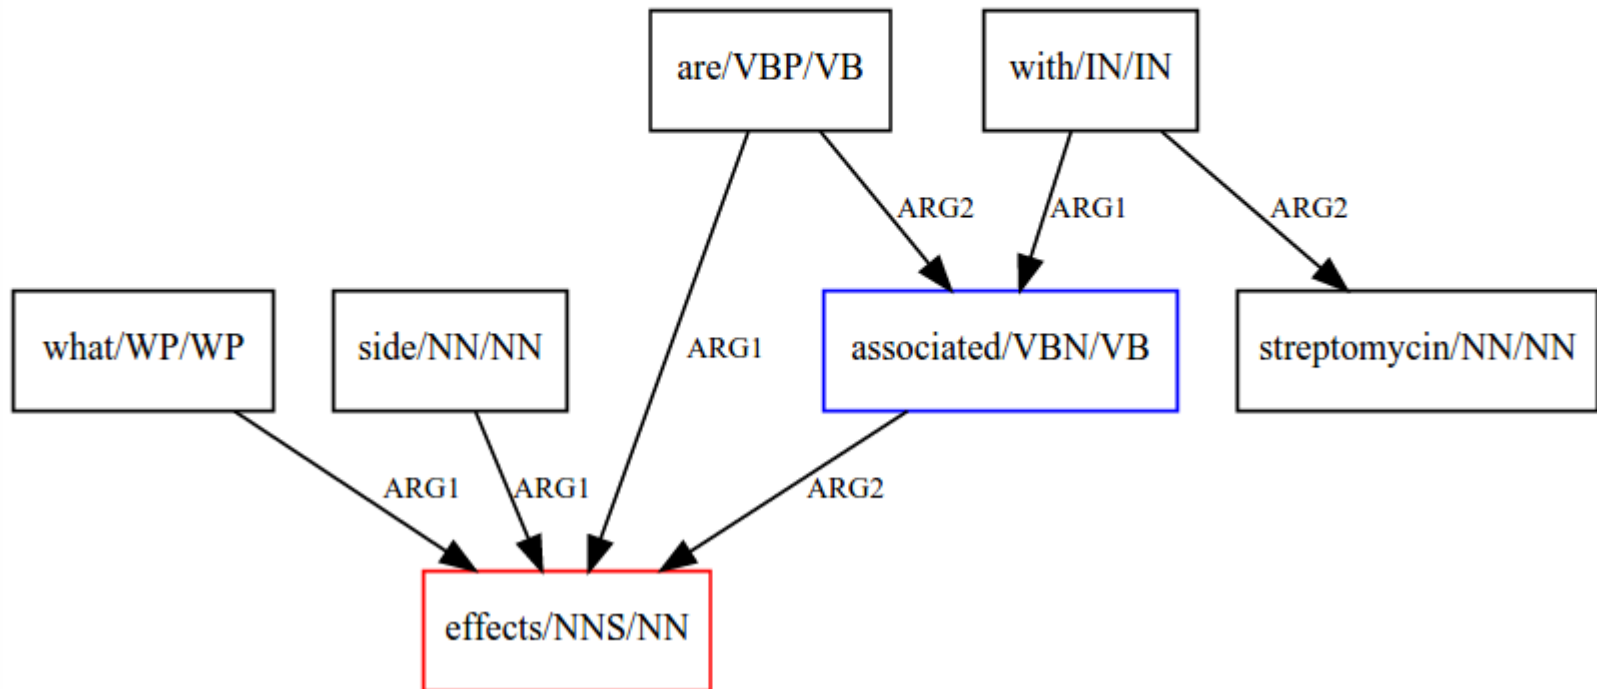

- what genes are associated with kabuki syndrome?
- what sign is associated with kabuki syndrome?
- what cellular dysfunction is associated with kabuki syndrome?
- what pathologic function is associated with kabuki syndrome?
- what neoplastic process is associated with kabuki syndrome?
- what anatomical abnormality is associated with kabuki syndrome?
- what genes are associated with alzheimer disease?

Query

what side effects are associated with streptomycin?

Semantic analysis (predicate-argument relation graph)

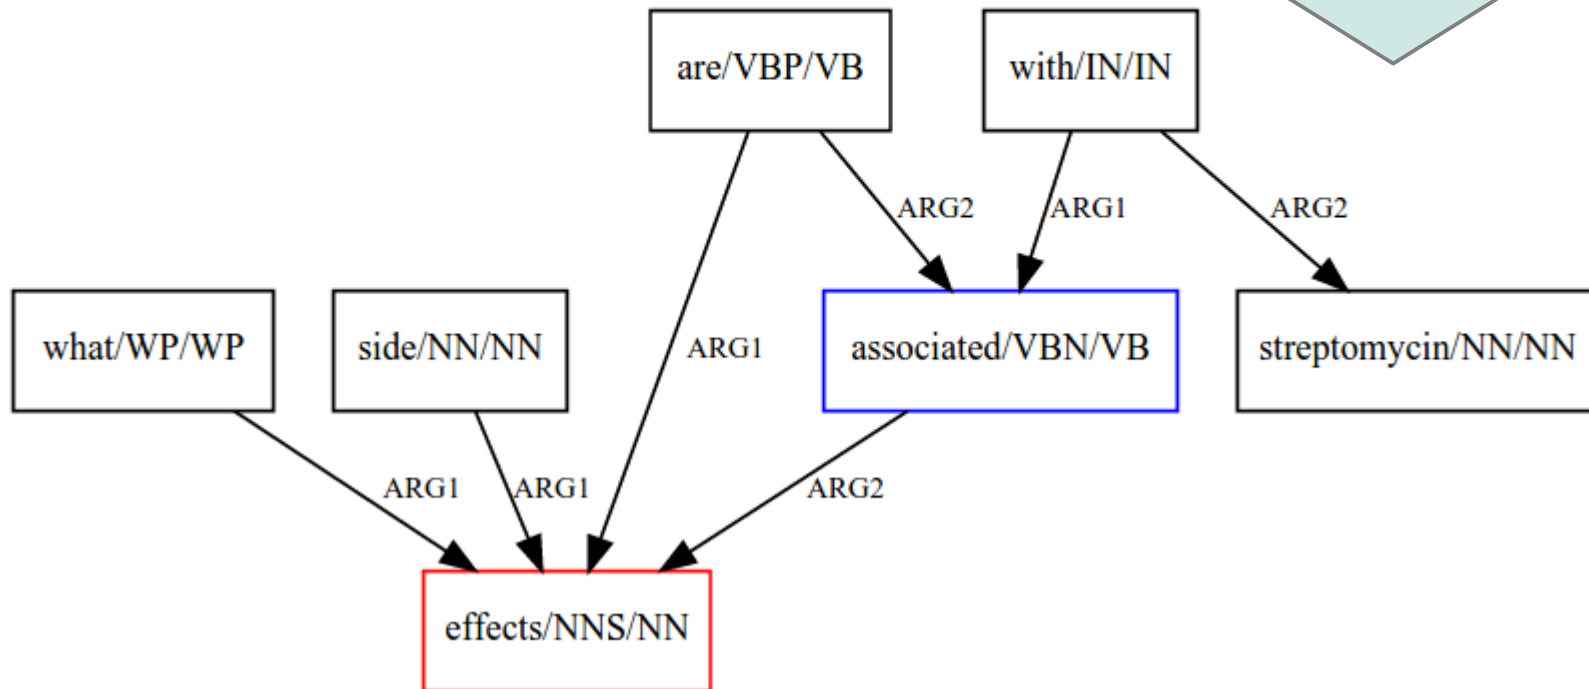

Query

what side effects are associated with streptomycin?

Semantic analysis (predicate-argument relation graph)

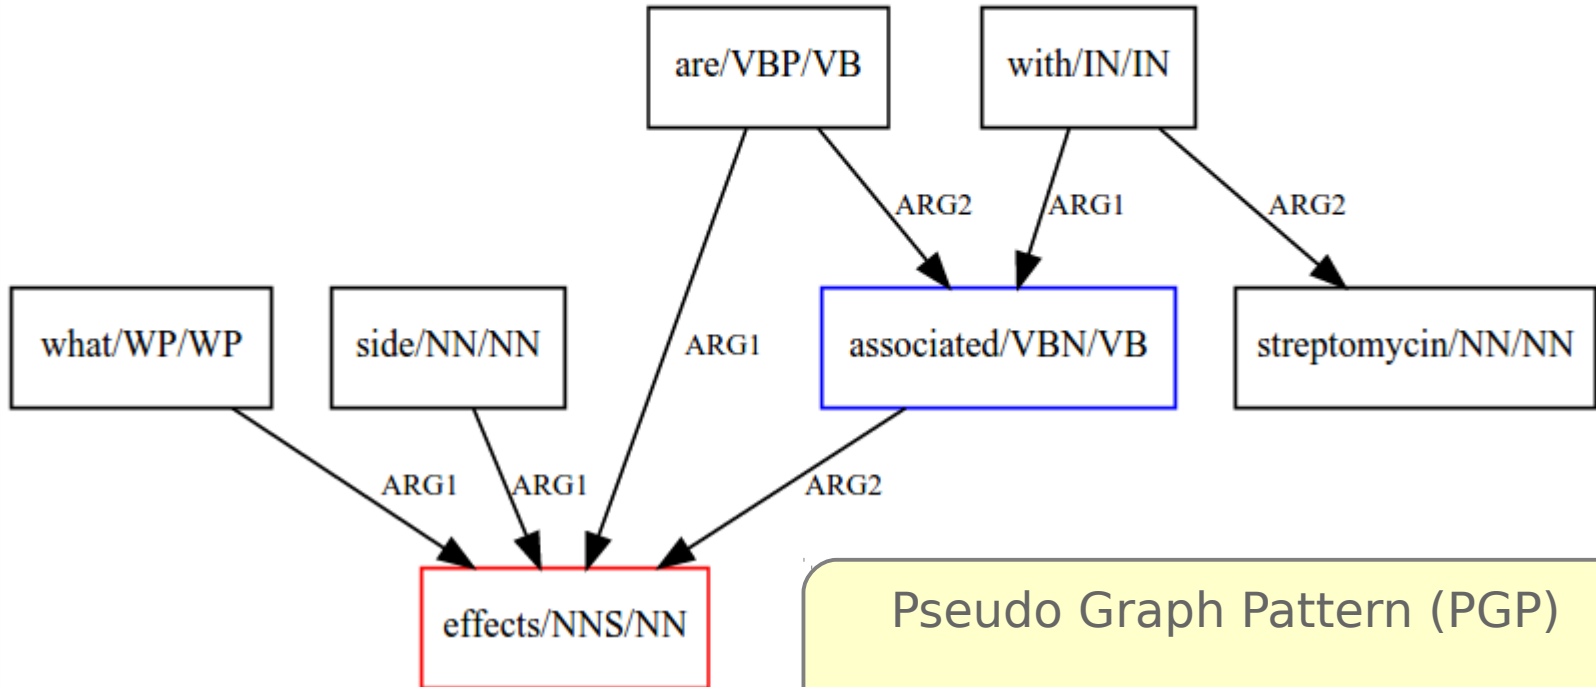

Enju HPSG parser

Query

what side effects are associated with streptomycin?

Semantic analysis (predicate-argument relation graph)

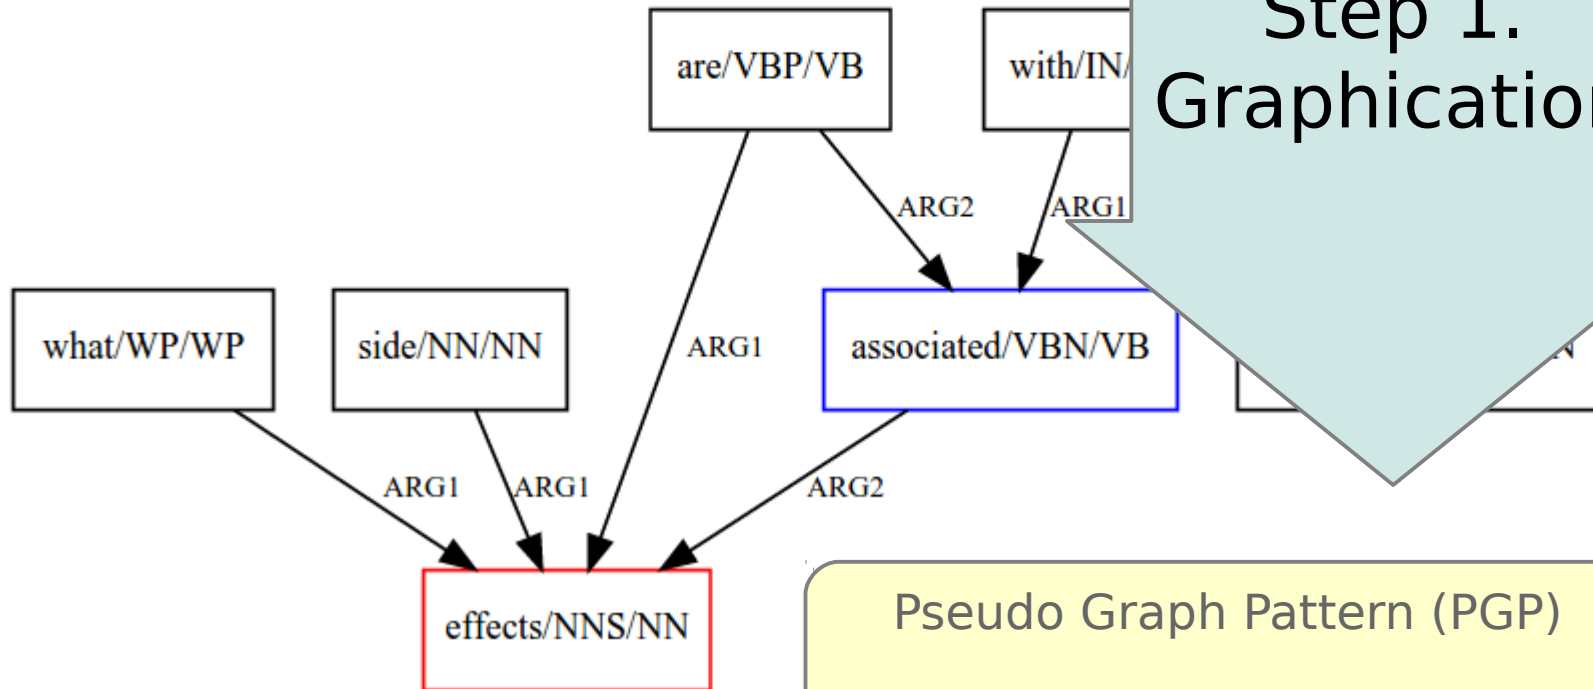

Pseudo Graph Pattern (PGP)

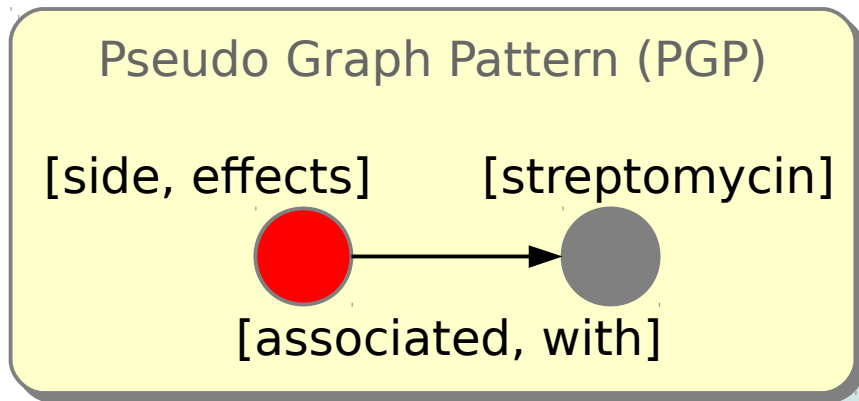

Query

what side effects are associated with streptomycin?

Semantic analysis (predicate-argument relation graph)

Graph Pattern matching

Target graph

A large, light blue, cloud-like shape representing a target graph, positioned to the right of the PGP diagram.

Step 2. Lexical Mapping

- [side, effect]
 - ✓ sider:side_effects
 - ✓ sider:sideEffectName
- [streptomycin]
 - ✓ drugbank:DB01082
 - ✓ drugbank:DB00428
 - ✓ Sider:5297
 - ✓ sider:5300

Step 3. GraphFinder

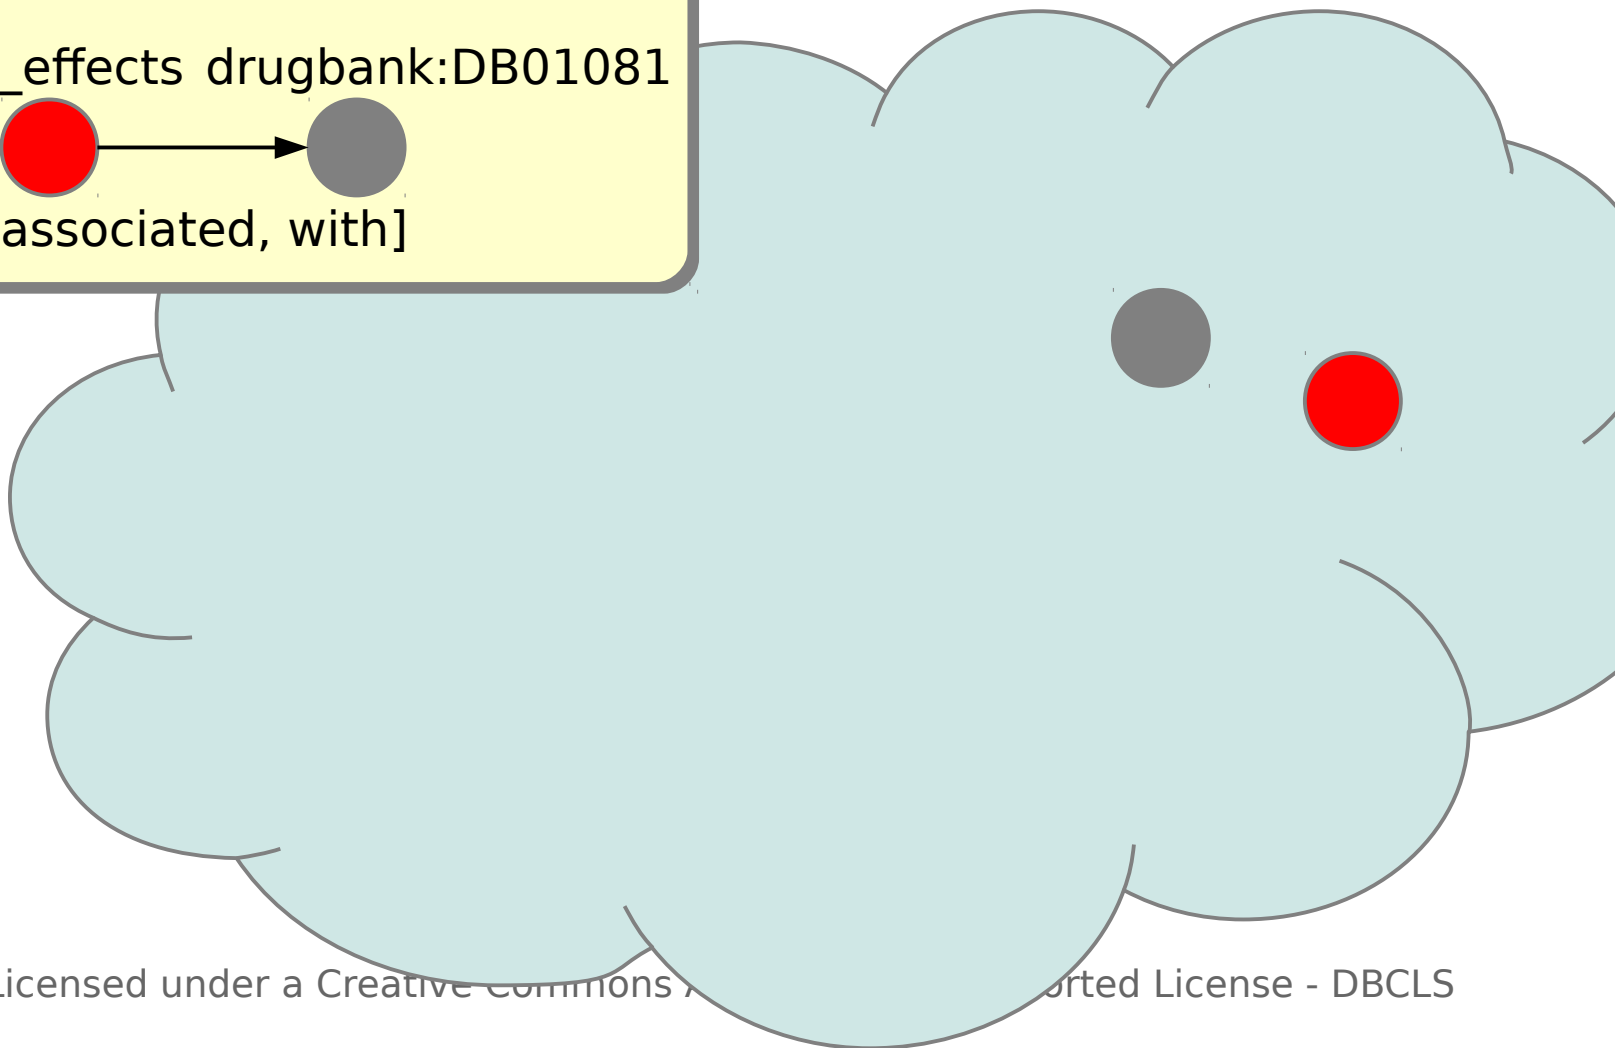

Anchored PGP

sider:side_effects drugbank:DB01081

[associated, with]

Target graph

Step 3. GraphFinder

Anchored PGP

sider:side_effects drugbank:DB01081

?p

Target graph

Final output: instances of the focused node

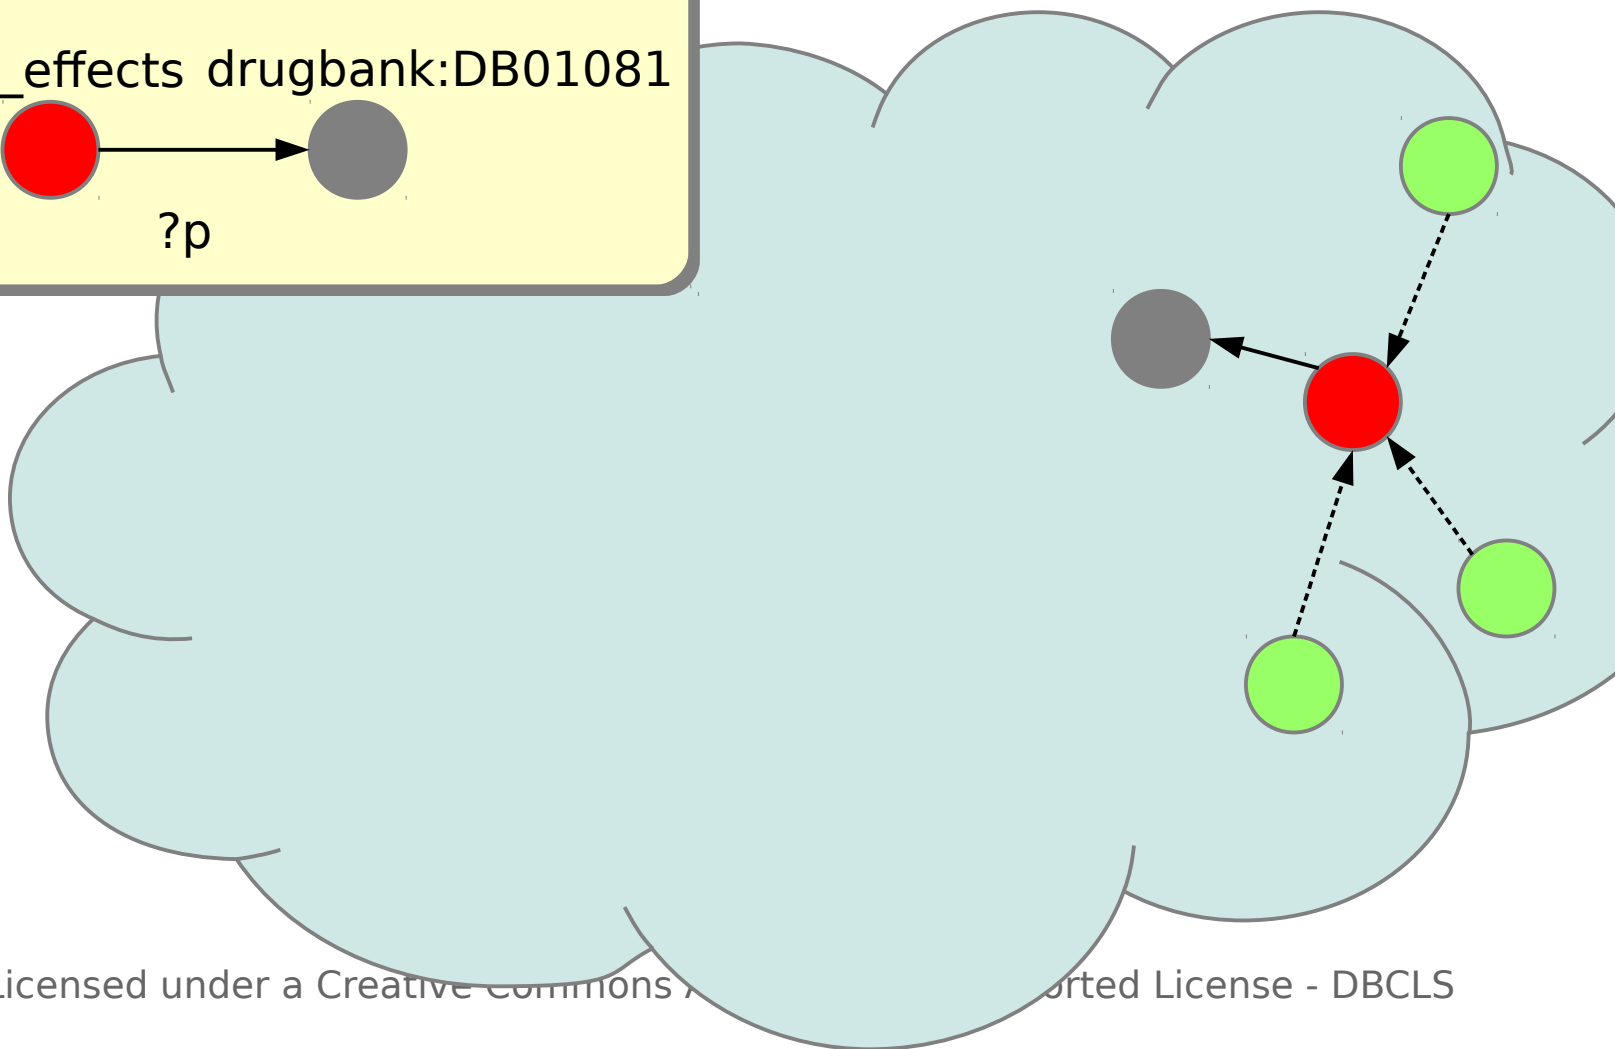

Anchored PGP

sider:side_effects drugbank:DB01081

?p

Target graph

Representational variations

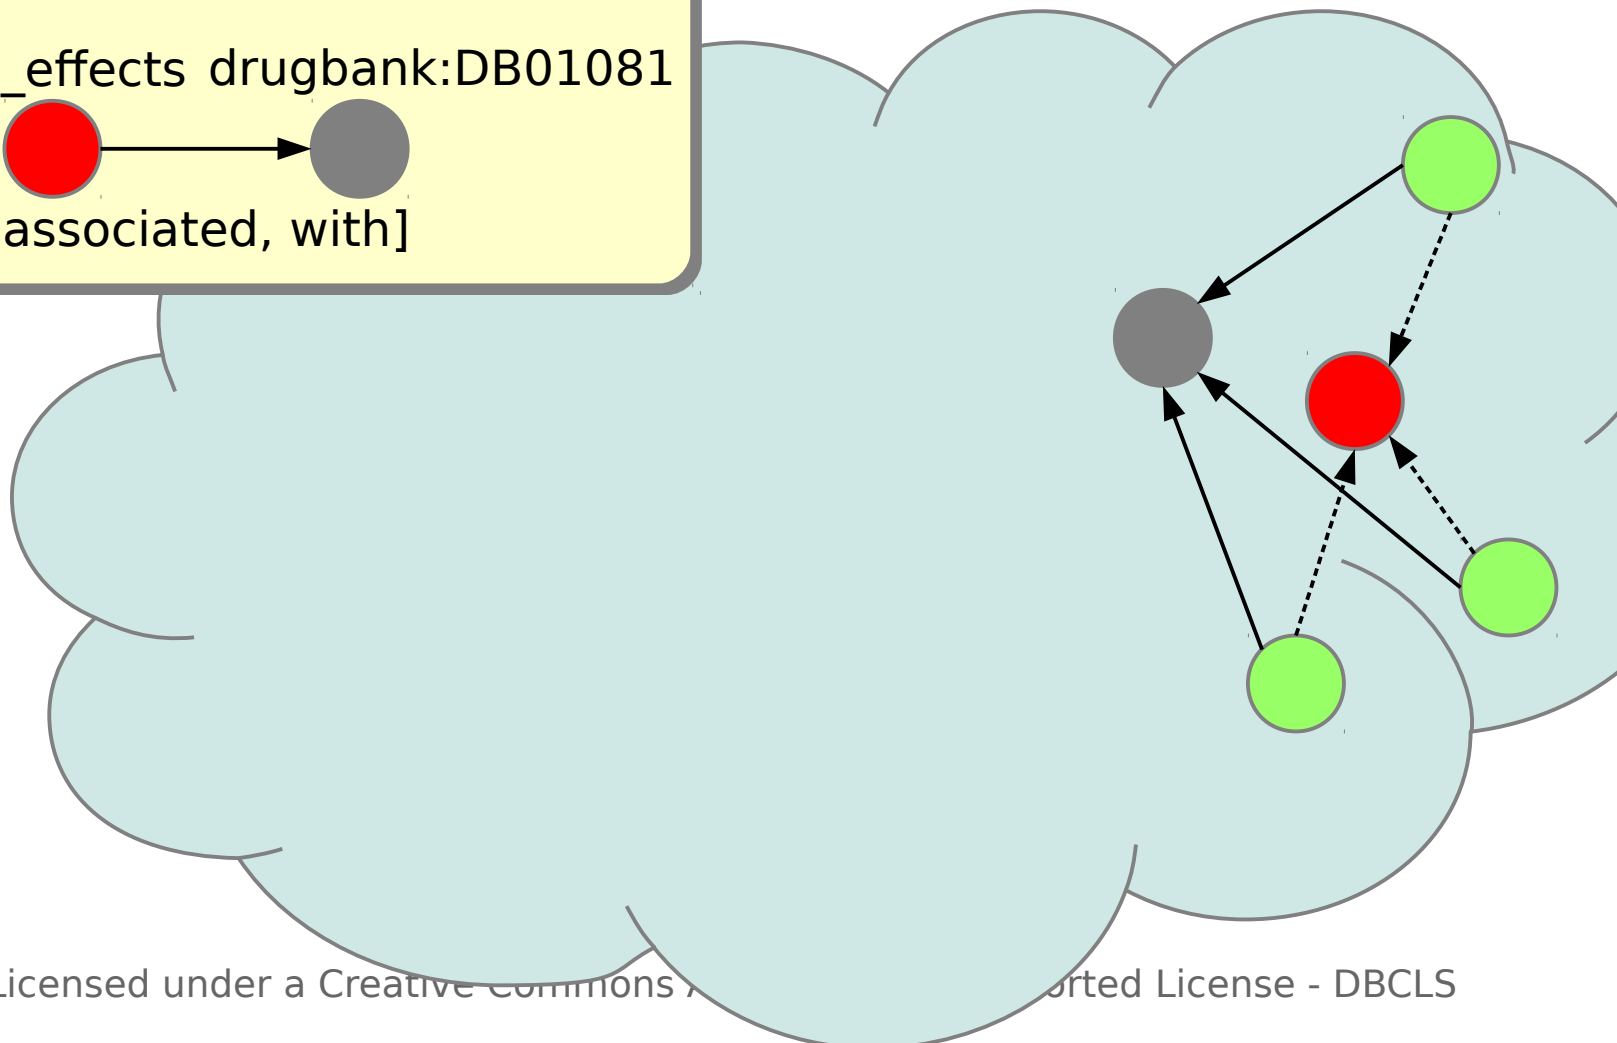

Anchored PGP

sider:side_effects drugbank:DB01081

[associated, with]

Target graph

Representational variations

Anchored PGP

sider:side_effects drugbank:DB01081

[associated, with]

Target graph

Representational variations

Anchored PGP

sider:side_effects drugbank:DB01081

[associated, with]

Target graph

Representational variations

Anchored PGP

sider:side_effects drugbank:DB01081

[associated, with]

Target graph

Operations for graph variation

① inversion

② split

③ join

④ instantiation

① Inversion

inversion

What proteins phosphorylate IκB?

② Split

split

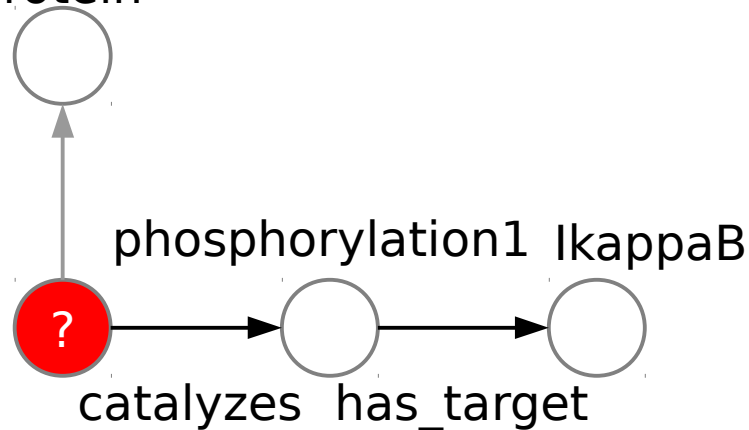

What proteins phosphorylate IκB?

[Proteins]

rdf:instanceOf
rdfs:subclassOf

Protein

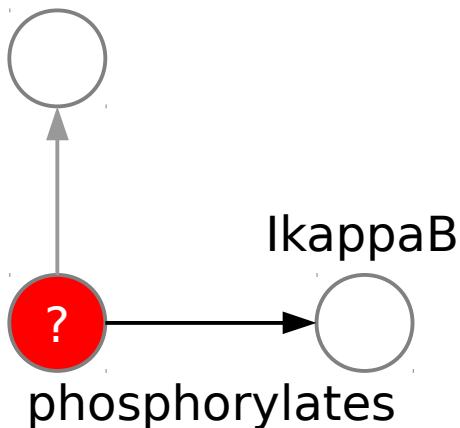

③ Join

split

What proteins catalyze the phosphorylation of IκB?

Proteins

Comparison to RelFinder

- RelFinder
 - ✓ <http://www.visualdataweb.org/refinder.php>
- GraphFinder generalizes RelFinder
 - ✓ two instances → two, three, four, ...
 - ✓ → classes or instances

Summary

- Three step approach

1. Graphicator

- Turns a natural language query into a pseudo graph pattern

2. Lexical mapping

- To anchor the pseudo graph pattern on the target graph

3. GraphFinder

- Search the KB graph for the pseudo graph pattern

Summary

- Three step approach

1. Graphicator

→ Turns a natural language query into a pseudo graph pattern

NLP task

2. Lexical mapping

→ To anchor the pseudo graph pattern on the knowledge graph

LOD task

3. GraphFinder

→ Search the KB graph for the pseudo graph pattern

Summary

- Three step approach

1. Graphicator

→ Turns a natural language query into a pseudo graph pattern

NLP task

2. Lexical

Representational difference needs to be absorbed

→ Translates pseudo graph pattern on to a graph pattern

LOD task

3. GraphFinder

→ Search the KB graph for the pseudo graph pattern

Summary

● Three step approach

1. Graphicator

→ Turns a natural language query into a ps
pattern

NLP task

2. Lexic

→ To graph pattern on t
under

TBSL

- Parsing
 - ✓ LTAG (lexical tree adjoining grammar)
 - Tree transformation
- Lexical Matching
 - ✓ ...
- Structural Matching
 - ✓ **Template generation**

TBSL

- To address complex queries
 - ✓ Who produced the most films?
- Generate templates
 - ✓ `SELECT ?y WHERE {
 ?x a onto:Film .
 ?x onto:producer ?y
}`
`ORDER BY DESC(COUNT(?x)) OFFSET 0 LIMIT 1`

TBSL

- To address complex queries
 - ✓ Who produced the most films?
- Generate templates
 - ✓ `SELECT ?y WHERE {
 ?x a onto:Film .
 ?x onto:producer ?y
}`
`ORDER BY DESC(COUNT(?x)) OFFSET 0 LIMIT 1`

Treo

- Parsing
 - ✓ Dependency parsing
- Lexical Matching
 - ✓ **Distributional semantics**
- Structural Matching
 - ✓ ...

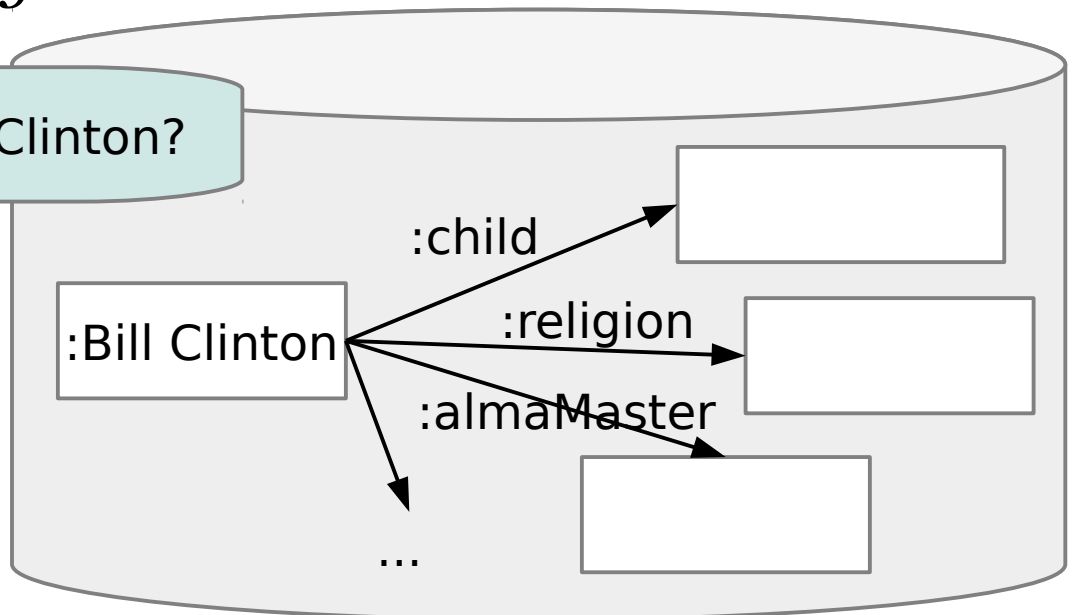

Treo

- Lexical matching

- ✓ Distributional semantics

→ “*linguistic items with similar distributions have similar meanings.*”

Who is the daughter of Bill Clinton?

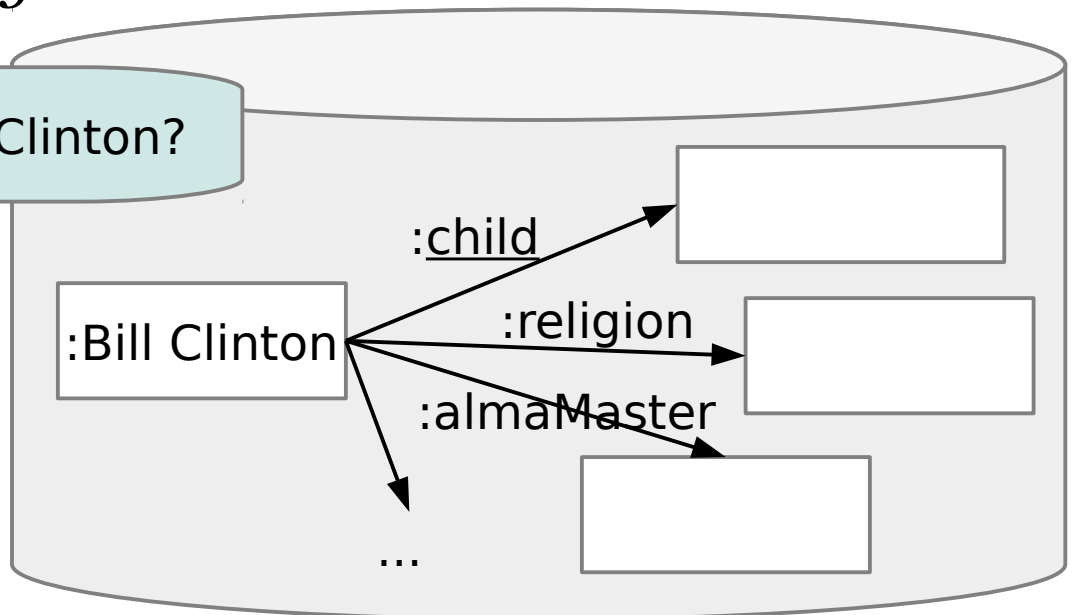

Treo

- Lexical matching
